ABOUT

I am pursuing a career in web development to engage my creative side, while also solving problems in a strategic way. Music and traveling are very strong passions of mine. While playing electric guitar for Hillsong Church, I had the opportunity to visit countries like England, Greece, Finland, Norway and Denmark. For the past 5 years I lived in Europe with my wife, who is Swedish. I love exploring different cultures, having lived on three continents has helped open my mind and given me a broader perspective on life.
